Respected Prime Minister I have few suggestion to make. a. Data base of LPG customers and PNG customers can be merged and LPG Connection of those having PNG connection are cancelled. This will help to come out of LPG crisis. Benefit of this system is being taken by marketing section of oil companies. b. A date can be given to all goverment offices to switch over to EV. Since government vehicle does not have parking issue, charging the vehicle could easily be installed. Retrofitting of old vehicles are available, therefore sanction of new vehicle in large number may not be required. c. It should be made mandatory of all government building to have ground water recharging through down take pipes from roof. This is not very costly and may be adjusted in building maintenance budget. Regards Shailesh Kumar Singh

----- Kindly find attached a policy proposal for the implementation of a National E-Beggar Identity System (EBIS) — a technology-driven, people-centric initiative aimed at bringing transparency, control, protection, and rehabilitation into the current unregulated begging ecosystem in India. This proposal recognizes that begging in India is not only linked to poverty but also to organized exploitation, child trafficking, forced begging networks, and misuse of public generosity. EBIS proposes a verified digital identity (E-Beggar Card) supported by an app-based platform, enabling identification, ethical assistance, rehabilitation tracking, and public participation. The initiative is designed as a voluntary and collaborative mission, encouraging participation from citizens, NGOs, religious institutions, CSR bodies, and local administrations, while strongly complementing existing schemes such as the SMILE Scheme. It converts unstructured charity into a transparent, accountable, and out

मोदी जी ₹1000 का नोट चलाने की कृपा करें ताकि ऑनलाइन पेमेंट और कैश दोनों में संतुलन बना रहे शादी शादी विवाह त्योहार और बड़े खर्चों में नकद लेनदेन करने में आसानी हो, कैश मैनेजमेंट में सहूलियत होगी क्योंकि ₹500 का नोट ही बड़ा होने से नकल लेनदेन में असुविधा होती है इसलिए ₹1000 का नोट चलाने की कृपा करें यदि ₹1000 के नोट को आधुनिक सुरक्षा फीचर्स, सीमित छपाई और बड़े नकद लेन-देन की निगरानी के साथ जारी किया जाए, तो काले धन और नकली नोटों की संभावना को काफी हद तक नियंत्रित किया जा सकता है। कृपया इस पर जरूर ध्यान दें।

This is not just a suggestion — this is a serious and urgent concern for our healthcare system. During multiple visits to government hospitals, I personally witnessed the extreme mental pressure our doctors and healthcare staff face every single day. Continuous patient load, emotional distress from families, emergency situations, and long working hours — all handled with patience and responsibility. But one question stayed with me: Who is taking care of the mental health of those who are taking care of us? If a doctor or healthcare worker is mentally exhausted or stressed, it directly impacts patient care. A calm, emotionally balanced doctor is not a luxury — it is a necessity for saving lives. This PDF highlights a genuine ground-level observation and a much-needed suggestion submitted to the Prime Minister's Office for immediate attention. 🌟 Mental wellness support for doctors and hospital staff should be made mandatory, not optional. I request everyone to take a moment, read this,

Delhi Noida region experiences highest pollution affecting the health of Citizen. Pollution is almost 10 times as that of Singapore. For progressing country, it is required to clean water and air both. The agriculture waste burning should be asked to pay income tax, which should be used for clean air policies implementation.
